Dashboard Insights

- Peak demand occurs during early morning (5–9 AM) and evening (5–9 PM).
- Airport experiences the highest "No Cars Available" requests, indicating a shortage of drivers.
- City requests have a higher cancellation rate compared to Airport requests.
- Trip Completed is the most common request status.
- The analysis indicates a significant demand-supply gap at the Airport, particularly during peak hours, leading to a high number of "No Cars Available" requests.
